Live Webcasting of CPhM Professional Development Programs

The College of Pharmacists of Manitoba Professional Development Committee is pleased to introduce live webcasting of PD programs through services provided by the St. Boniface Hospital Research Centre. In addition to offering programs through videoconferencing, PD programs will also be made available to pharmacists through live webcasting.

To get started:

St. Boniface Hospital Research recently updated their live webcast site. If you are new to this site, you will need to register a new username and password. Please visit the St. Boniface Hospital Research website to register: <http://www.sbrstream.ca/1.aspx>.

To participate in a live webcast:

Login at <http://www.sbrstream.ca/1.aspx> using the username and password you created. Click on “Live Events” and go to the program date. Click on the folder marked “College of Pharmacists of Manitoba” and enter the case-sensitive password “CPhM”. It is best to connect to a live webcast at least 5 minutes before it is scheduled to begin.

During the live webcast, you have the opportunity to communicate to other participants and the speaker by sending comments “privately” or “publicly”. To direct questions to the speaker, begin your comment with the word, “Question” and send it publicly. Speakers will view and respond to questions at the end of the presentation.

CEU certificates will be sent to all pharmacists participating in the live webcast within the week following a program.

To obtain a program handout:

Depending on the program, program handouts will be posted on the PD page of the College website approximately 2 days prior to the live event or the day immediately following the live program.

For any questions regarding PD Programs, please email profdevelopment@cphm.ca.
